

Global (bi)cycle initiative Think Bike Workshops And inspirational practices from the Netherlands.

Urban, Active, Safe: Strategic Planning for Bike-Friendly Cities
Transport and Climate Change week 2024

“Capacity building and workshops of such ideologies should be implemented at all major cities and also at municipality level to enhance the knowledge and awareness amongst everyone.”

TOP 1:

“Field visit made more understanding of existing scenario’s and the changes that can be implemented after the training.”

— *“Junction designing based on the field experience by visiting te site and understanding actual problems facing by different peoples.”*

TOP 2:

“Group discussions made everyone to put their opinions, two way learning experience.”

TIP:

“Increase the number of practical exercises to understand the current situation at site.”

STRUCTURE OF THINK BIKE WORKSHOPS

Introduction

Introduction to the Dutch approach to urban mobility and transportation.

Site visits

In teams (by bike, if possible). Problem identification.

Problem solving

In teams. Exploring solutions through theory and practice.

Discussion

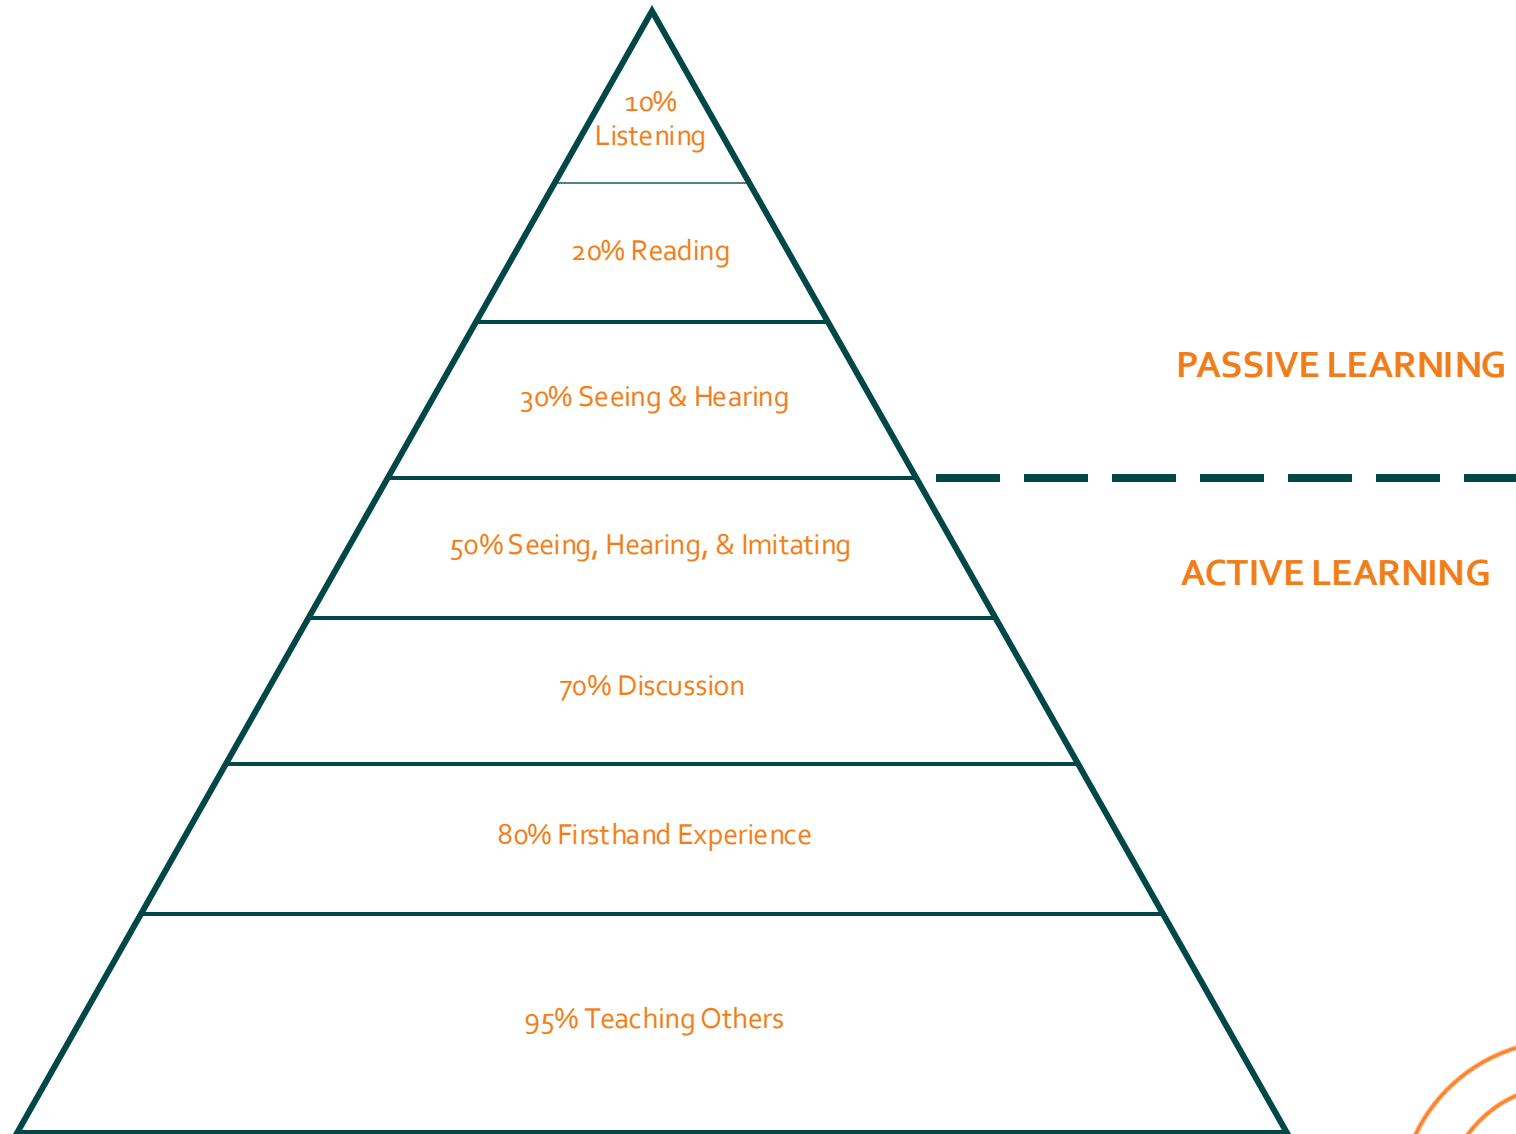

Presentation of solutions with drawings, photos, designs, and a marketing strategy.

Good to know: The final discussions and presentations of solutions can take place in the presence a range of stakeholders, for example elected officials, politicians, local police, leaders and members of cycling associations, press and anyone interested in the future of sustainable transportation in the city.

HOW WE LEARN

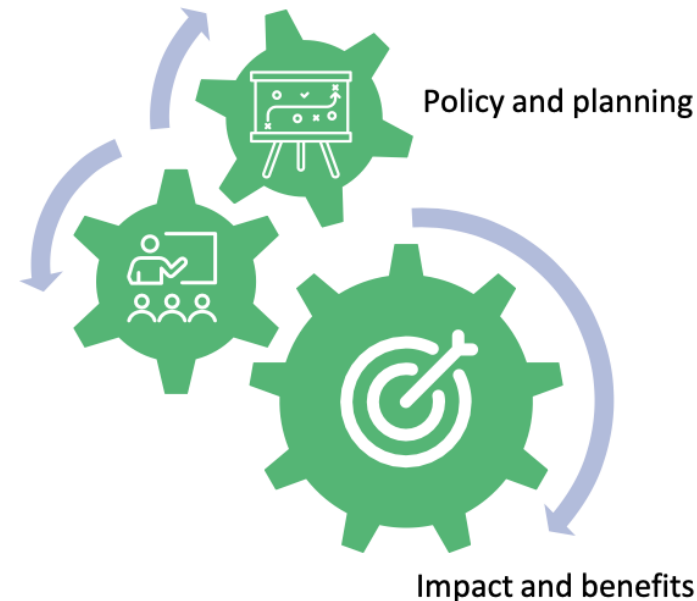

Goal ACTIVE

- 10.000 active mobility experts within 10 years
- Sustainable Development Goals (SDG's)

Capacity-building

ACTIVE TRAINING MAPUTO

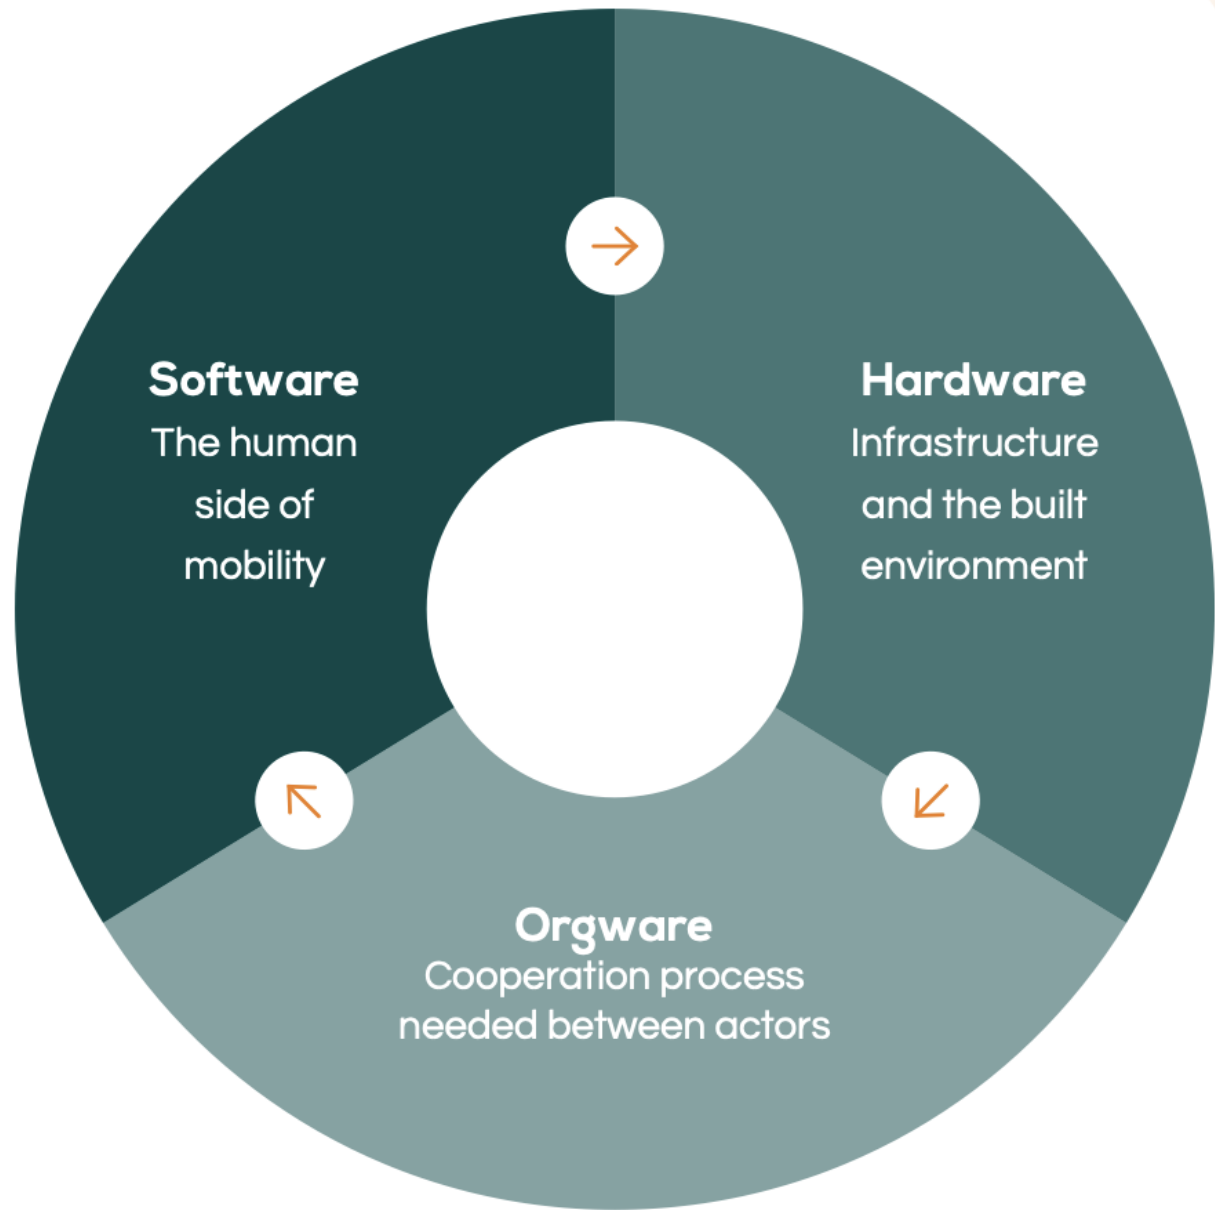

“The use of bicycle is good at all levels as Mozambicans in a developing country, [it] is necessary to include accessible modes of transport. And sometimes the use of bicycle is seen just for poor people, but with these kinds of trainings I believe that stereotype will be broken.”

WHY THE DUTCH?

DUTCH INTEGRATED APPROACH

— It wasn't always
this way...

LEARNING FROM OUR MISTAKES
