Let's Take Action: Connecting the Dots! Welcome to Transport and Climate Change Week 2024

15:30 Hrs
Raising Climate Ambition in Transport: Insights from Transport Ministers on How to Lead Politically Sensitive Change

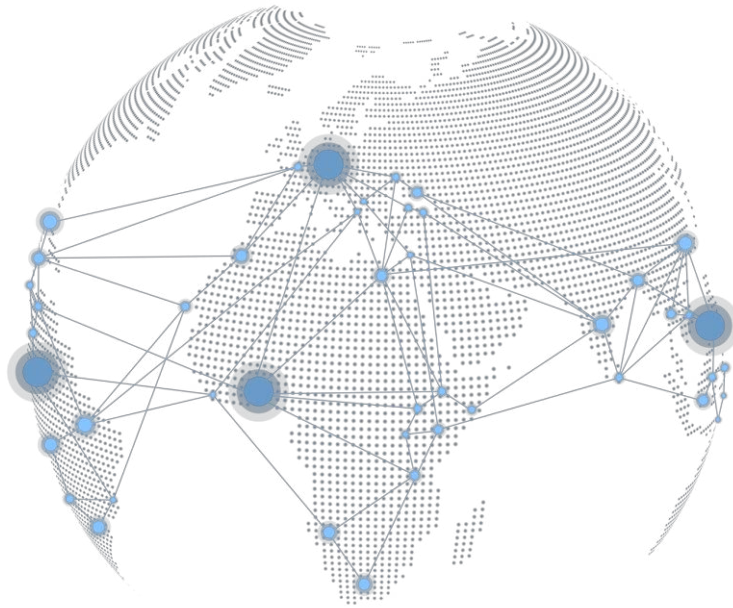

Connecting the dots
Fostering global transport climate action

By **#Connectingthedots**, we are creating an environment for integrated solutions, ensuring a global perspective and fostering global transport action.

To facilitate and enable you to take away what can be helpful to apply in your context, we have designed this fanzine as a printing format. Use it to mark the sessions you want to attend. Once printed, to fold it follow the instruction below.

We hope you get the best of this online edition of Transport and Climate Change Week. Please share your notes with us!

2025

Time to be accountable
Achievements, transformation strategies in place

2024

Connecting the dots
Fostering global transport climate action

2023

Building upon & beyond
Looking at the past, shaping the future

Invitation to Act

On **Monday** 4 November, #TransportWeek24 will kick off with an official welcome from the authorities, followed by a keynote speech. We will have an honest conversation about political leadership and adaptive change.

Multisectoral Urban Mobility

Tuesday 5 November will be dedicated to multisectoral cooperation and gender transformative systems to achieve affordable and sustainable urban mobility. The second day will be dedicated to learning from the regional experiences in the **Western Balkans**.

Standards & Innovation

On **Wednesday**, the regional perspective from **Africa** will provide benchmarking with proven solutions and an invitation not to reinvent the wheel. We will address adaptation in transport. As part of the day, we will open up to the wider ecosystem conversing about fuel roadmaps. We will close knowing the regional perspective from **Latin America**.

The Climate Commitment

Thursday will be our Conference Day, time for climate commitment. This year, the regional **Asian** perspective will invite us to achieve the NDC targets. Standards in transition with a truck decarbonisation perspective and a vehicle efficiency analysis. The peak of the week will be a message for future transport climate action to be delivered to the UNFCCC COP 29 in Baku.

Tracking Change

On **Friday**, the week will conclude with a discussion on tools for tracking change and the role of think tanks. As farewell of the week, we will share the concept for Transport and Climate Change Week 2025, the 8th edition of which will be hosted in person in Berlin.

Transport Week is a time when we all come together to bring to the global table experiences, lessons learned, solutions and open questions. This year will be dedicated to **spot** achievements, **connecting** solutions, integrating **approaches**, and calling for **action**, with activities stemming from these objectives.

We will be happy to hear from you, do not hesitate to contact us.
