SUMP guides investment in the Green Urban Core

GIZ-supported planning connects the pilot with the wider urban concept

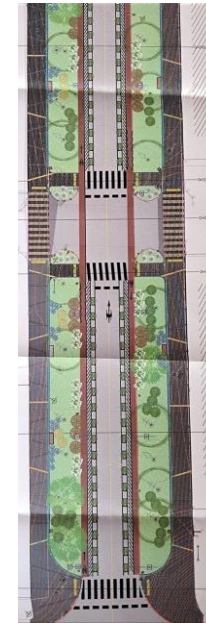

SUMP and development plans define mobility investment priorities.
Green Urban Core translates them into phased improvements.

Square: planned concept

Square and playground: planned concept

Street: planned design

Works in progress, Sept 2026

Street design addresses stopping outside shops

Mehmed-paše Sokolovića Street: existing conditions and planned redesign

Existing street and parking

Stopping outside shops

Planned design

AT & ŠE / Adelina Šabić, Sept 2026

Protected walking and cycling space, green separation, organised parking and deliveries

Partnership helps cities adapt and replicate solutions

GIZ support connects local planning with practical learning

Capacity-building sessions

Climate risks in mobility planning
and better prepared investment proposals

EU city exchanges and site visits

Assess good practices in use
and adapt them to local conditions

Regional cooperation

Share experience and practical lessons
with Western Balkan cities

National coordination

Connect local priorities with the
ministry responsible for transport

Next: phased financing, implementation and monitoring
