

# Driving the Transition: Scaling Up Climate-Friendly Reefer Transport Through Cooperation

08.10.2026

# Speakers

**Kirsten Orschulok,**  
Project lead Greener Reefers,  
GIZ

**Judith Musau,**  
Maritime Project Manager,  
Kuehne Climate Center (KCC)

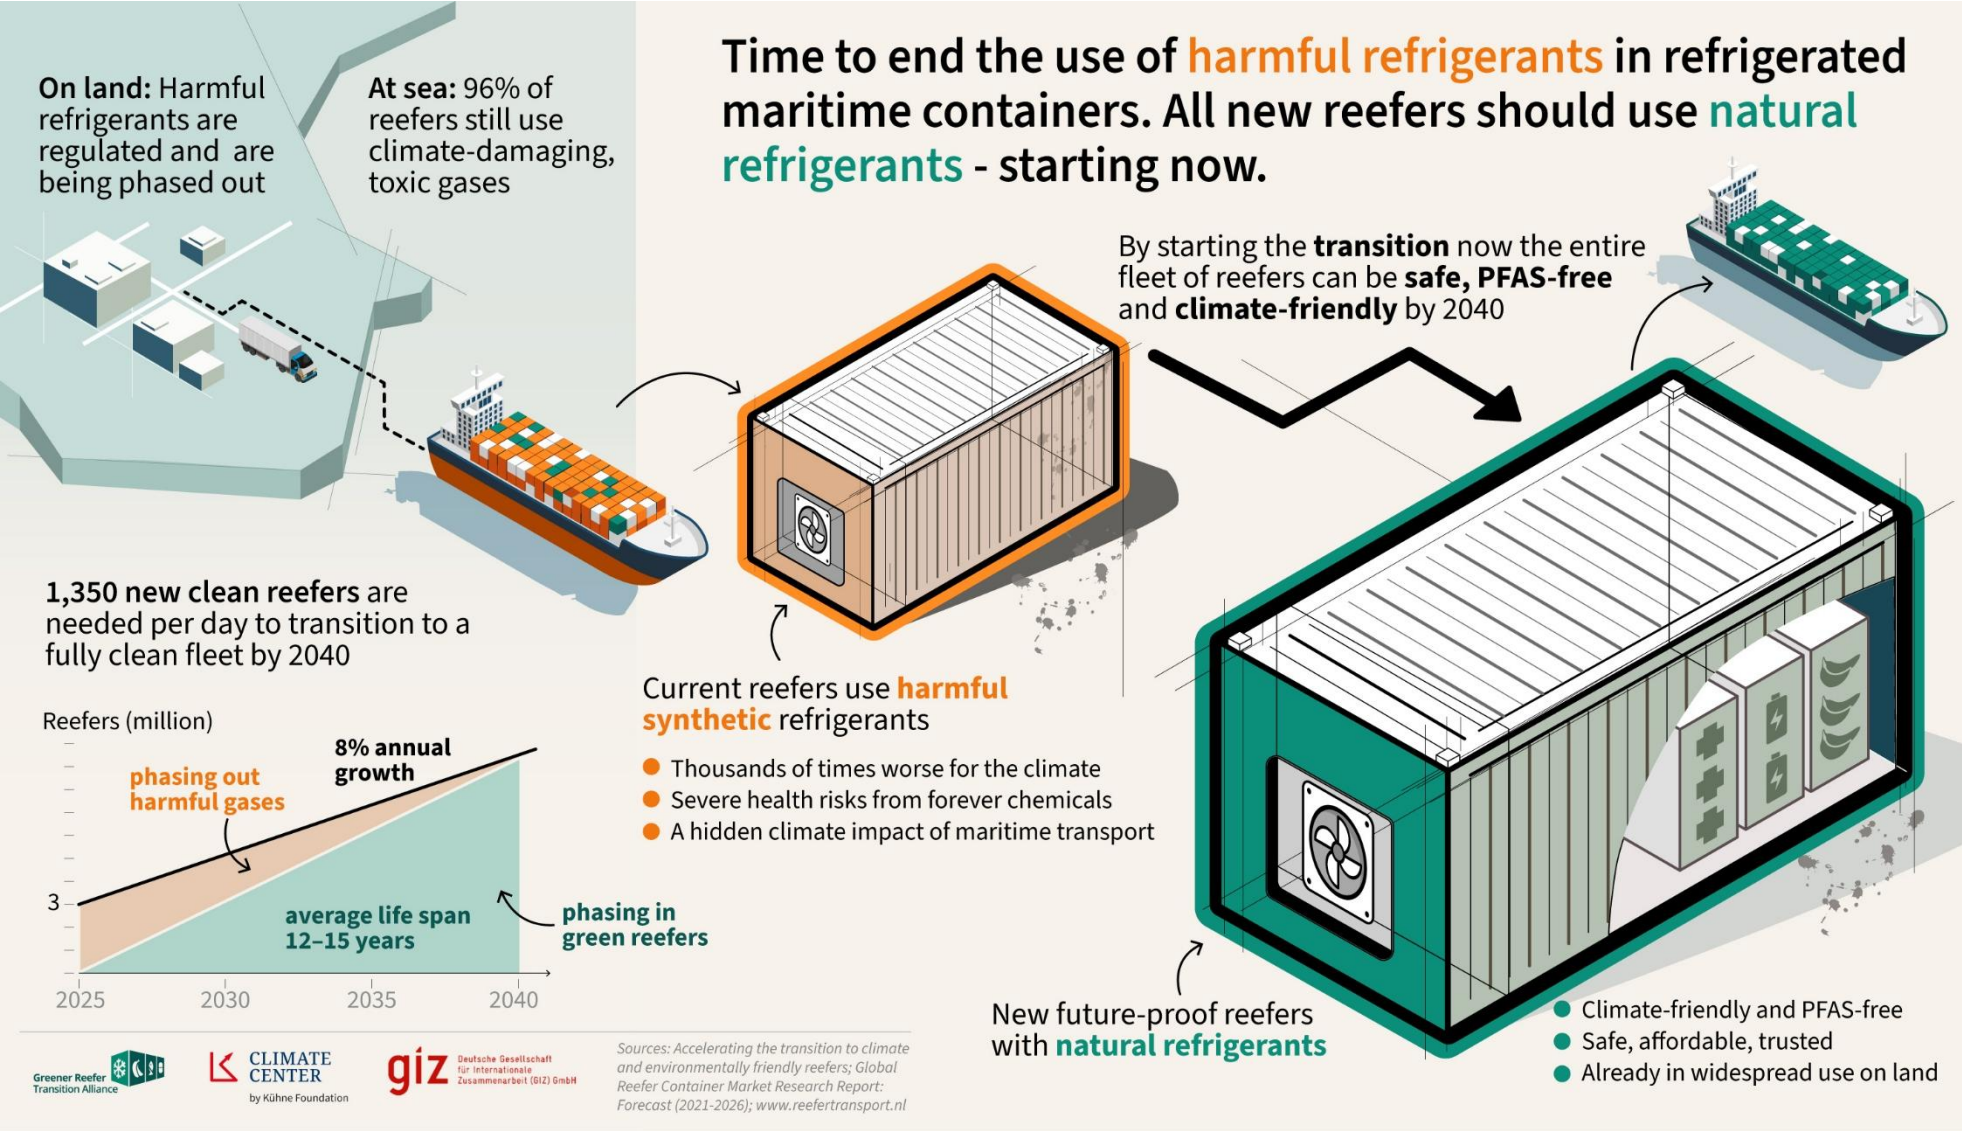

**Santiago Martinez Ballester,**  
Laboratory Manager BCN & Lead  
Refrigeration Engineer,  
Thermo King/ Trane Technologies

**Greener Reefer**  
Transition Alliance

# KCC and GIZ are collaboratively working to accelerate the adoption of Greener Reefers

## Gap:

Bringing natural refrigerated reefers to the shipping industry

# Why trainings on natural refrigerants matter in the reefer industry

**Skill Development:** Training technicians to implement eco-friendly cooling technologies, reducing reliance on HFCs.

**Environmental Impact:** Supporting emissions reductions and energy efficiency.

**Industry Standards:** Workshops provide hands-on training for sustainable refrigeration practices, nationalization of international standards.
